SOIC16 Packaged Pressure Sensor

## DESCRIPTION

Silicon Microstructures provides its most popular pressure sensor die in a surface mount dual in-line package (SO-16) configuration. All parts in this series are uncompensated high performance die mounted in an injection-molded package designed for surface mounting.

The low pressure series SM5470 incorporates Silicon Microstructures unique low pressure die to achieve high performance in pressure ranges from 0.15 PSI (1 kPa) to 1.5 PSI (10 kPa) full-scale in gauge and differential configuration.
